

GREENENERGY Initiative –program for realizing investment opportunities on Ukraine renewable energy market

ICC Ukraine program on «green» energy development in Ukraine

- Actual, strategic, priority
- Renewable sources of energy
- Implementation of energy efficiency & energy saving

Current situation and targets

Generation of alternative energy in Ukraine exceeds 1% in overall energy balance

Ukraine targets to raise this indicator to 10 % by 2015.

Types of renewable energy sources that are currently being developed in Ukraine

- Solar energy

- Wind energy

- Small hydro

- Biomass

- Biogas

State incentives

- ✓ Guaranteed off take by the State
- ✓ Attractive minimal green tariff rates
- ✓ EE equipment import incentives (Customs duties, VAT)
- ✓ Tax incentives (profit tax, VAT)

Program activity directions:

- Creation of favorable conditions for development
- Investment attraction
- Support of projects' implementation

Creation of attractive conditions for «green» energy development:

Commission on green investments, alternative and renewable sources of energy:

- Activity at national and international level
- Combining of expertise
- Implementation of Action Plan - competitive advantages of Ukraine in investments attraction

Commission legislative initiatives

Plan of joint actions:

- Green tariff for electricity production out of biogas
- Qualification for getting green tariff before starting construction
- Requirements for "Ukrainian component": achievement of balance
- Simplified permission procedures
- Use of biomass as a source of energy
- Tax and other privileges: working mechanism

Investment attraction:

- Private investments
- Institutional investments
- New funding mechanisms

Local partner in project implementation

Within Program the following Projects are being implemented:

- Biomass CHPs
- Biogas plants
- Small hydro power stations
- Wind power stations
- Solar power plants
- Energy crops
- Coal mines degasation
- MSW landfills degasation
- Energy saving implementation

Support to participants

- Identifying and providing with projects
- Identifying and recommendation of local partners
- Local project management coordination
- Support and representing interests in cooperation with regional authorities state regional (administrations and municipalities)
- Support to securing land rights
- Consultancy and support to importing energy efficient equipment

Support to participants

- Consultancy and support to applying tax incentives (profit tax, VAT) for energy efficiency and renewable energy objects as fixed in the Tax code of Ukraine
- Consultancy and support to obtaining green tariff
- Support in structuring project finance
- Engineering, procurement and construction (EPC)
- Identifying and representing interests for establishing production JV

GREENERGY Participants

Platform for effective Public-Private Partnership:

- State agency on energy efficiency and energy saving of Ukraine
- National Electricity Regulatory Commission of Ukraine
- State Agency for Investment and National projects
- Ministry of energy and fuel industry of Ukraine
- Ministry of regional development, construction and municipal economy of Ukraine
- State Environmental Investment Agency of Ukraine
- State Regional Administrations

Welcome to collaboration!

Darya Revina

- ❖ **ICC Ukraine Vice-Chairman on energy efficiency,**
- ❖ **Head of Commission on green investments, alternative and renewable sources of energy under Cabinet of Ministers**
